Dear Shareholders,

Through geochemical studies, we discovered the presence of rare earth elements over a large area at our Hay Mountain Project. The potential remains important to the company and rare earth elements maintain a strategic importance to our national security and economy. Therefore, I thought you would find last Sunday's *60 Minutes* program interesting.

Sunday night's *60 Minutes* broadcast, "*Modern life's devices under China's grip?*" hits the highlights and challenges of REEs.

View the re-broadcast at CBS.com

Enjoy,

Jim Briscoe
