## Porphyry Copper & Gold Exploration Prospect

Hay Mtn Project  
Cochise County  
Arizona - USA

**LBSR: OTC BB / LBSR PK**

### WHY LIBERTY STAR?

1. Potential for discovery of a high grade and large sediment and porphyry hosted copper, gold, and moly ore body of the same type as the nearby Bisbee deposit and other commercially important ore bodies throughout southeast Arizona
2. Multiple targets over copper-gold anomalies have been plotted using sophisticated ground studies including rock-chip, soil and vegetation geochemical samples assayed for 64 elements by a Certified Assay Laboratory, airborne ZTEM geophysical surveys producing magnetic and electromagnetic data and technical reports from an independent Qualified Geophysicist Geologist
3. Recent discovery of surface copper-mineralized outcrops suggests near surface targets, significantly lowering development time and costs
4. Drill permits in hand: ready to go!

# Now is the time! FINALLY!
