

# Porphyry Copper & Gold Exploration Prospect

Liberty Star Uranium & Metals Corp. is an Arizona-based mineral exploration company engaged in the acquisition, exploration, and development of mineral properties in Arizona and the southwest USA. **Our flagship property is the porphyry copper-gold Hay Mountain Project in Cochise County, Arizona.** Liberty Star's CEO is registered professional geologist James A. Briscoe

**LBSR: OTC BB / LBSR PK**

***Now is the time! FINALLY!***

**"The big companies desperately need high-quality deposits in stable jurisdictions... From a risk-reward perspective, I think this sector is the place to be." -Ronald-Peter Stoferle, analyst, Erste Group Bank AG**

## MINING

**TRENDING**

Hay Mountain Project Geochem sample

## EXPLORATION STRATEGY

- **DRILL PERMITS IN HAND – READY TO GO**
- **Liberty Star's Hay Mountain greenfield project has progressed from surface studies to Phase 1a drilling**
  - **determine continuity to depth of surface geochem & subsurface geophysical anomalies**
  - **discover mineral asset location/grade/depth & continuity**
- **Continue capital raise to increase number of drills in field. Plan shallow extraction program based on Phase 1a drilling results.**
- **Conclude long term Joint Venture agreements/sales agreements. Identify additional resources. Focus on copper/gold & multi-element mine development**

RISK FACTORS FOR OUR COMPANY ARE SET OUT IN OUR 10-K AND OTHER PERIODIC FILINGS FILED WITH THE SEC ON EDGAR.
